## Application for Data Science Internship

Dear Hiring Team at Kanadevia Inova,

I recently came across your job posting on LinkedIn, and it immediately caught my attention. Your mission to transform waste into valuable resources through technology and innovation strongly resonates with me. Moreover, winning the 2024 Project Finance International (PFI) Award for the Abu Dhabi Waste-to-Energy Project highlights your outstanding success in delivering innovative and sustainable energy solutions.

Currently, I am advancing my knowledge in Data Science at FHNW while gaining practical experience through sustainability-focused R&D projects. These opportunities have strengthened my skills in applying machine learning techniques, conducting data exploration, and supporting technical development processes. In addition to expanding my technical expertise, working in interdisciplinary teams has enhanced my collaboration and problem-solving abilities, even under time pressure.

Thanks to these experiences, my strong communication skills, and my solid technical background, I am confident that I possess the ideal qualifications to actively support R&D projects at Kanadevia Inova. I am highly motivated to contribute to the advancement of your digital innovation initiatives and to continuously develop new solutions together with your team in order to meet the long-term needs of your clients.

I would welcome the opportunity to discuss how my background, skills, and motivation could contribute to your projects.

Best regards,

Ivan Halka
