Dear Hiring Team at Kanadevia Inova,

I am writing to express my enthusiasm for the Data Science Internship opportunity at Kanadevia Inova. Your company's mission to transform waste into value aligns deeply with my own passion for sustainability and data-driven innovation.

I am currently completing a Data Science internship at FHNW, where I support projects such as EUCLID and Biocycling, focusing on circular economy and environmental impact. My work involves both research and hands-on data projects — from building AI models for waste classification, to developing visual typologies and working with municipalities to improve data accessibility. I recently contributed to the SIMPLA_GRÜN pilot, helping implement sustainable plastic alternatives.

I have experience with Python, scikit-learn, PyTorch, and data visualization tools, as well as a background in communication and design. What sets me apart is my ability to collaborate, translate complex ideas for diverse audiences, and connect technical insights to real-world outcomes. I speak English fluently (C1) and have good working knowledge of German (B2/C1).

I'm excited about the opportunity to join Kanadevia Inova's Technology & Digitalization team and contribute to innovative solutions that serve both people and the planet. I would welcome the chance to discuss how my background and motivation can support your mission.

Thank you for considering my application.

Best regards,

Ivan Halka
